

- 1) 1-4 high set and enter the ball to the wing.
- 2) Follow this pass up with a UCLA cut.
- 3) **Coaching Point:** Set up your cut on the back screen and read the defense. Do not predetermine your cut.

- 1) 1 then immediately turns and sets a diagonal screen for 5.
- 2) This turns into a screen the screener action. 4 then sets a screen for 1 who cuts hard to the top of the key. 2 is spacing a gaining depth on the weakside.
- 3) **Coaching Point:** Do not become a patern team. If is open on the slight post on the block and he/she is able to score there, never pass up scoring opportunities just to "run the offense."

- 1) Now you have the ball in your best players hands once again in the center of the court and you have been able to stretch the defense to create space.
- 2) Now is good time to have your posts screen for the guards on each side of the court. Back screen on one side and down screen on the other.
- 3) **Coaching Point:** Give you players freedom to create within structure. This is a good time to penetrate, but you also have to teach how to read the defense and hitting the open player.
