

- 1) We call this '4' because the 4 player will take the ball out.
- 2) This is particularly effective when x4 is protecting the basket.
- 3) 4 will inbound the ball to 1, who should be the best post feeder. And 4 will step right in to post up.

- 1) If all goes well, 1 should be able to feed 4 under the bucket.
- 2) Especially if x4 is very concerned about protecting the rim, 4 should be able to finish at the bucket.

- 1) If the defense is able to defend the post entry properly, there is a counter to this.
- 2) Putting your best shooter on the opposite block is ideal. If x2 helps on the backside to prevent the lob on 4, this double screen is ideal to get 2 a jumper at the top of the key.
