

1) Starting in this 3 out look, run your best shooter to the corner - and have the ball swung to that same wing.

1) You want the zone to react to the initial movement.  
 2) Then run your shooter back to the same spot that he/she started in only run him/her through the zone. Have the ball passed back to the top of the key.  
 3) You want the defense to react again to the movement.

1) After the zone has reacted again, now 4 & 5 will "X" out & screen the bottom of the zone.  
 2) 3 will be open on a lob pass on the back line.
