

- 1) Out of this box set, the point guard will dribble to one wing which will pull the opposite guard off of a screen.
- 2) That guard will curl around to the ball side block.
- 1) Once the initial cut has occurred, the other guard will come off of a double pin down screen from each post.

- 1) This sets up the third cut for the same wing who started the action.
- **2)** Both post players will come together for another double screen, which should set up an open shot.

- 1) An alternate option here would be if 2 curls the 2nd double screen.
- 2) This will set up the action in frame 5.

- 1) Once the curl occurs from 2, this should open up a pin-down for 4 in the lane.
- **2)** This is effective if you have a 4 player who can shoot & if x4 helps over on the curl.
